Grambling State University – Alternative Teacher Certification Program (ATCP) Classroom Observation Form

The Classroom Observation Form is used to document each observation time period. Along with your application and this sheet, please include a 400-500-word reflection of your observations. Your reflection should include how the classroom was set up. Was it conducive for learning? How was the teaching environment? Were students engaged in the learning process? Were students and the teacher respectful to each other? As result of observation, which ideas/techniques would you implement in your class? Which techniques/ideas did you find least effective?
