

Office of the President

March 24, 2011

Grambling State University (GSU) embraces the role that it plays in ensuring that transfer students from community colleges have a seamless transition into the university. We offer programs and services that support the success of transfer students. One service offered provides feedback to community colleges regarding the performance of their former students enrolled at GSU.

The purpose of this communication is to share data with you on the performance of student transfers during the 2010 Fall semester who were previously students at your school. Thirty-seven former students enrolled at Grambling State University for the 2010 Fall semester. The average grade point average for these transfers at the end of the fall semester was 2.41 on a 4.00 scale. The highest grade point average earned by this group was 4.00. The lowest grade point average was 0. The average grade point average for all incoming transfer students from community colleges was 2.54. This data shows that the student is highly competitive with other transfer students.

To increase the success of transfer students who had a rocky transition into the university, these students have been directed to our Office of Retention and Student Support Services. Should you desire additional information regarding the performance of your transfer students, please let us know.

We look forward to receiving more of your graduates.

Sincerely

Frank G. Pogue, Ph.D.
President
