

# BIOLOGICAL SCIENCES

Where Biology Meets Purpose and Possibility

The Department of Biological Sciences prepares students for diverse career paths, including medicine, dentistry, allied health, biomedical research, environmental science, and education. With a strong commitment to student success, the department provides a nurturing environment that supports personal growth and guides students toward achieving their academic and professional aspirations.

## Bachelors in Biology-General Concentration

This concentration provides the pre-requisite courses needed for students who plan to pursue advanced degrees in medicine, veterinary medicine, pharmacy, allied health professions or other graduate degrees in the biomedical sciences

## Bachelors in Biology-Environmental Centration

This concentration provides the pre-requisite courses needed for careers in monitoring, protection and conservation of the environment or graduate studies in environmental biology and the environmental science related areas.

## 3 + 3 Doctor of Chiropractic Degree Track 1 & Track 2

This concentration provides the pre-requisite courses to students interested in becoming a Doctor of Chiropractic Medicine. Our partnership with Life University School of Chiropractic Medicine and Logan University allows students that have successfully completed the 3 + 3 curriculum and have met all other criteria for admission to be accepted into their program.
