PROFESSIONAL PROFILE/OBJECTIVE

- My goal is to use my Military, Computer Information Systems, and Higher Educational experience to assist in creating Innovate Digital Education (IDE) experiences for all learners. I wish to provide leadership and vision in developing and engaging the student community with the use of the IDE techniques to help in student leadership development. With over 31 years of experience in higher education, I prefer to work in the classroom, but I can also instruct virtually. I wish to further utilize my skills in assisting in developing Educational – Science, Technology, Electronics, and Math (E-STEM) programs using the *Participative, Interactive and Engagement* (PIE) instruction technique. Finally, with over 3 decades of experience, I can provide support in Curriculum & Instruction programs, student counseling, career advisement, administration, faculty and staff development, research and instructional design, and training to help construct and apply knowledge to make a positive difference in the lives of individuals, families, organizations, and diverse communities.
