

# Tiger Tech

*Grambling State University  
Information Technology Department*

## Advisory/Notification

### Coming Soon EduRoam!

Eduroam is a secured wireless network that allows students, faculty and staff to use their Grambling credentials ([username@gram.edu](mailto:username@gram.edu) or [username@gsumail.gram.edu](mailto:username@gsumail.gram.edu)) to access wireless networks when visiting other eduroam participating institutions without having to setup a guest account. GSU community will have the option of using eduroam as their primary WiFi instead of Gram-Wireless.

All users must download the appropriate eduroam installer or they will not connect. The configuration assistant tool can be downloaded at <https://cat.eduroam.org/> by clicking on "download your eduroam installer"

### New WIFI SSIDs are Coming!

You may notice new wireless internet options available on campus, below is a list of the new wireless network options that will be available:

- Gram-Wireless – Faculty/Staff/Students
- Gram-IOT – SmartBoards/Kiosk's/TV's
- Gram-Guest – 24-hour access for guest without a Grambling email
- Gram-Guest-Events- temporary internet access for Grambling events
